PROFILE

iOS Developer specializing in Swift, SwiftUI and MVVM, delivering clean, scalable apps with RESTful API integration and polished UI/UX. Experienced across consumer products and private enterprise building-management platforms, with a focus on performance and reliability, and features benefiting over 4 million users.

WORK EXPERIENCE

Appcom Solutions Technologies, iOS Developer

01/2025 - Present

Four applications: Elite Interact, PMS & Technical Services, Cerebro, Swoop

Elite Interact (community app for residents)

- Build and enhance a community-focused app that lets residents pay utility bills quickly and securely.
- Implement access to essential building resources and resident service requests.
- Deliver timely notifications for announcements and community updates.
- Craft a reliable, intuitive experience that links residents with community services.

Private building-ecosystem applications

- **PMS & Technical Services:** engineer features for a building-management app covering maintenance requests, technical tasks and access-card control for vehicle barriers and building doors.
- **Cerebro:** support an administrative app that gives operators a consolidated view of buildings, services, requests and access, and enables activity monitoring.
- **Swoop:** develop features for a car-washing app where residents request and manage services.
- Apply Swift, SwiftUI, MVVM, RESTful APIs and JSON integration to keep code maintainable and performant.

AppCake, Freelance iOS Developer

09/2024 - 12/2024 | Freelance

- Redesigned and built a new SwiftUI interface for an existing app, meeting modern UI/UX standards while preserving all existing functionality.
- Adopted new JSON-based data structures for application data handling.
- Connected the Dropbox API to manage app data and streamline the user experience.
- Optimized performance and functionality with clean, readable code.

Perfectz Digital, iOS Developer

02/2022 - 07/2024 | Jakarta

at Cakap

- Maintained the Cakap iOS app and resolved bugs in its legacy codebase.
- Implemented MVVM architecture, increasing maintainability by 40% and cutting feature-module development time by 25%.
- Conducted code reviews on GitLab.
- Migrated the Qiscus SDK chat feature to SwiftUI and MVVM, boosting performance by 40% and cutting bug-related maintenance time by 60%, improving reliability and user experience.
- Safeguarded business logic with unit tests.
- Collaborated in an Agile team, using RESTful APIs, GitLab, Jira and Confluence to deliver high-quality, user-centered apps.

IROHUB INFOTECH, Internship

07/2021 - 12/2021 | Kochi

- Spearheaded the Shop Now App, a location-based deal-finding application, delivered within a 6-month internship.
- Implemented location-based deal-finding features in Swift and UIKit, structured with MVC architecture.

EDUCATION

Calicut University, Bachelor of Computer Applications

07/2018 - 03/2021

SKILLS

Technical Skills (Swift • SwiftUI • UIKit • MVVM • RESTful APIs • JSON • API Integration • Unit Testing • Core Data • UI/UX Development)

Tools (Xcode • GitLab • GitHub • Jira • Confluence • Sourcetree)
